

Approved Tax Software for Florida's 2016 eFile Program (updated February 14, 2017)

The following vendors have been approved to offer software for Florida's eFile program. Vendors are arranged by tax type and name in alphabetical order with no preference given to any company or product. Not all tax types are listed because the Department does not approve software for all taxes. (For example, the Department does not currently approve software for reemployment tax.) Place your mouse over the company's web address and click to access their website.
