Column B – Tax Rate

Lines 1-3. The current tax rate is printed on the return.

Column C – Tax Due

Lines 1-3. Multiply the amount in Column A (Taxable Gross Receipts or Costs) by the tax rate in Column B.

Line 4. Column C Total. Enter the total of Lines 1, 2, and 3.

Line 5a. DOR Credit Memo. Enter the amount of credit memo issued by DOR and attach a copy of the original memo.

Line 5b. Other Credits. Enter the amount of allowable credits, such as gross receipts taxes paid to a service provider for taxable services that are resold by you.

Line 6. Total Credits. Enter the total of Lines 5a and 5b.

Line 6. Amount of Tax Due. Subtract Line 5 from Line 4. Enter total amount of tax due. If your return is late, complete Lines 7 and 8. If timely, skip to Line 9.

Return due date:

A return must be filed even if no tax is due or EFT payment sent.

Read pages 3 and 4 before completing this form.

What is the gross receipts tax for utility services? The tax is imposed on gross receipts from the sale, delivery, or transportation of natural gas, manufactured gas, or electricity to a retail consumer in Florida.

Line-by-Line Instructions

Column A – Taxable Gross Receipts or Costs

Line 1. Electric Receipts. Enter the total due on taxable electric utility service receipts.

Line 2. Use Tax/Cogeneration or Small Power Producers. Enter the total amount of costs subject to tax. See Page 3. A use tax component of gross receipts tax may impact persons who cannot prove payment of tax.

Line 3. Gas Receipts. Enter the total due on taxable gas receipts. See Page 4. Use the appropriate fiscal year index price for each class of customer (residential, commercial, or industrial).

(continued on page 2)
Under penalties of perjury, I declare that I have examined this tax return and the facts stated in it are true.

Authorized Signature __________________________________________

Date __________________________ Telephone __________________________

Title __________________________________________
Who must file a return?

**Distribution Company.** Each distribution company that receives payment for the sale or transportation of natural or manufactured gas or electricity to a retail consumer in Florida must report and remit the gross receipts tax from utility services.

“Distribution company” means any person owning or operating local electric, or natural or manufactured gas utility distribution facilities within Florida for the transmission, delivery, and sale of electricity or natural or manufactured gas. The term does not include natural gas transmission companies that are subject to the jurisdiction of the Federal Energy Regulatory Commission.

**Use Tax.** Any person who imports into this state electricity, natural gas, or manufactured gas, or severs natural gas for his or her own use as a substitute for purchasing utility, transportation, or delivery services taxable under Chapter 203, F.S., who cannot prove payment of tax, must register and report and remit gross receipts tax. Tax is applied to the “cost price” of electricity as provided in s. 212.02(4), F.S.

**Cogeneration or Small Power Producers** are required to report and remit gross receipts tax. Tax is applied to the “cost price” of electricity as provided in s. 212.02(4), F.S.

Electricity produced by cogeneration or by small power producers is electricity that is:

- Transmitted and distributed by a public utility between two locations of a customer of a utility according to s. 366.051, F.S.
- Produced for the producers’ own use as a substitute for electrical energy produced by an electric utility.

What is exempt?

A complete list of tax-exempt transactions is provided in Chapter 203, F.S. Examples of exemptions include:

- A sale, transportation, or delivery of natural or manufactured gas or electricity for resale when documented in compliance with Department rules.
- Wholesale sales of electric transmission service.
- The use of natural gas in the production of oil or gas, or use of natural or manufactured gas by a person transporting natural or manufactured gas, when used and consumed in providing such services.
- The sale or transportation to, or use of, natural or manufactured gas by a person eligible for an exemption under s. 212.08(7)(ff)2., F.S.
- A sale, transportation, or delivery of natural or manufactured gas for use as a fuel in the generation of electricity.

**Taxable Gross Receipts or Costs (use for completing Column A, Line 2)**

Use tax/cogeneration or small power producers should enter in Column A, Line 2, the total taxable cost price of electricity or natural gas or manufactured gas, and follow the line-by-line instructions.

“Cost price” is defined in s. 212.02(4), F.S., as the actual cost of articles of tangible personal property without any deductions for the cost of materials used, labor or service costs, transportation charges, or expenses.
Go to floridarevenue.com/taxes/taxesfees, select “Gross Receipts Tax on Utility Services,” and then select the link for “Index Prices” for current index prices used to calculate gross receipts.

**Taxable Gross Receipts for Gas Receipts (use for completing Column A, Line 3)**

**Distribution Company:** The tax levied on a distribution company’s gross receipts from the sale or transportation of natural gas or manufactured gas is determined by dividing the number of cubic feet delivered by 1,000 and multiplying the resulting number by the appropriate index price (residential, commercial, or industrial).

**Index Price:** The Florida price per 1,000 cubic feet for retail consumers in the previous calendar year as published in the United States Energy Information Administration Natural Gas Monthly and announced by the Department of Revenue on June 1 of each year. The price will be effective for the 12-month period beginning July 1 of that year.

**Index Price Calculations for Column A, Line 3 – Gas Receipts:**

1. Total number of cubic feet delivered to **residential customers** divided by 1,000, then multiplied by current index price.
2. Total number of cubic feet delivered to **commercial customers** divided by 1,000, then multiplied by current index price.
3. Total number of cubic feet delivered to **industrial customers** divided by 1,000, then multiplied by current index price.

Add the totals for all classes of customers and enter the result in Column A, Line 3. Follow the line-by-line instructions to complete the return.

**Example:** A distribution company sells 3 million cubic feet of natural/manufactured gas to each customer class:

1. Residential customers: (3,000,000 divided by 1,000) multiplied by current index price ($22.00)* = $66,000
2. Commercial customers: (3,000,000 divided by 1,000) multiplied by current index price ($13.81)* = $41,430
3. Industrial customers: (3,000,000 divided by 1,000) multiplied by current index price ($11.77)* = $35,310
4. Add the results from 1 through 3 ($66,000 + $41,430 + $35,310 = $142,740). Enter the total in Column A, Line 3.

* Index price not actual; for illustration only.
