

NON-HOMESTEAD ASSESSMENT LIMITATION REPORT EDITS (r. 2022)

This section of the document includes a listing of the five non-homestead assessment limitation report edits. Included in each listing is the following information: the edit question, a description of the edit, the use codes that are reviewed, the fields displayed in the edit sub-report, why parcels appear in the report, the descriptive and mathematical formulas for each edit, and the SQL statements for each edit.

Because these edits cannot consider every scenario, a parcel may be correct even though it has been flagged in the sub-edit report.

Non-Homestead Assessment Limitation Report Edit 1

Does the report show any counts for all unsold non-homestead properties with the current non-school assessed value greater than 10 percent over the previous non-school assessed value?

CURR-ASSD-VALUE LESS NET-NEW-CONST > 10% OVER PREV-ASSD

This edit relates to unsold non-homestead residential and non-residential properties where the current assessed value increased more than 10 percent over the previous assessed value. This calculation excludes properties that were homestead or classified use on the previous roll. This calculation also excludes splits, combines, net new construction value and parcels with a disaster code in the prior year's tax roll.

DOR USE CODES REVIEWED: 000-049, 070-096, 099

FIELDS DISPLAYED IN SUB-REPORT 1: PARCEL_ID, USE_CD, CURR_ASSD, PREV_ASSD, CURR_JUST, PREV_JUST, CURR_NEW_CNST, CURR_DELETION, HSTD, PCT_DIFF

PARCEL WILL SHOW UP IN THE EDIT SUB-REPORT IF: The current assessed value is greater than 10 percent over the previous year's assessed value (taking into consideration new construction and deletions values if applicable).

PERCENT DIFFERENCE CALCULATIONS: To calculate the percent difference in the edit, four different calculations can occur, depending on whether a new construction and/or deletion value is present:

- The Current Assessed Non-School Value minus the Previous Assessed Non-School Value, then divided by the Previous Assessed Non-School Value
- The Current Assessed Non-School Value minus the New Construction Value, then minus the Previous Assessed Non-School Value, then divided by the Previous Assessed Non-School Value
- The Current Assessed Non-School Value plus the Deletion Value, then minus the Previous Assessed Non-School Value, then divided by the Previous Assessed Non-School Value
- The Current Assessed Non-School Value plus the Deletion Value and minus the New Construction Value, then minus the Previous Assessed Non-School Value, then divided by the Previous Assessed Non-School Value
- **The mathematical formula is:**
$$\frac{(((\text{Current Assessed Value} - (\text{New Construction-Deletion})) - \text{Previous Assessed Value}) / \text{Previous Assessed Value}) * 100}$$

Non-Homestead Assessment Limitation Report Edit 2

Does the report show any counts for all unsold non-homestead properties with the current non-school assessed value increased less than 10 percent over the previous non-school assessed value and the current non-school just value is greater than the current non-school assessed value?

CURR-ASSD-VALUE LESS NET-NEW -CONST < 10% OVER PREV-ASSD & CURR-JUST-VALUE
> CURR-ASSD-VALUE

This edit relates to unsold non-homestead residential and non-residential properties where the current assessed value increased less than 10 percent over the previous assessed value and the current just value is greater than the current assessed value. This calculation excludes properties that were homestead or classified use on the previous roll. This calculation also excludes splits, combines, and net new construction value.

DOR USE CODES REVIEWED: 000-049, 070-096, 099

FIELDS DISPLAYED IN SUB-REPORT 2: PARCEL_ID, USE_CD, CURR_ASSD_NON_SCHOOL, PREV_ASSD_NON_SCHOOL, CURR_NEW_CNST, CURR_DELETION, JUST_HIGH_WATER_RECHARGE, JUST_WORKING_WATERFRONT, JUST_LAND_193_501, HSTD, CURR_JUST, PREV_JUST, PCT_DIFF, C_PCT_DIFF, EXEMPTIONS

PARCEL WILL SHOW UP IN THE EDIT IF: Current assessed value is less than 10 percent over the previous assessed value and current just value is greater than the current assessed non-school value.

PERCENT DIFFERENCE CALCULATIONS: To calculate the percent difference in the edit, four different calculations can occur, depending on whether a new construction and/or deletion value is present:

- The Current Assessed Non-School Value minus the Previous Assessed Non-School Value, then divided by the Previous Assessed Non-School Value
- The Current Assessed Non-School Value minus the New Construction Value, then minus the Previous Assessed Non-School Value, then divided by the Previous Assessed Non-School Value

Non-Homestead Assessment Limitation Report Edit 3

Does the report show any counts for all unsold non-homestead properties reported with new construction of more than 25 percent of the previous total just value where the current non-school assessed value is less than the current non-school just value?

CURR-NET-NEW-CONST > or = .25 X PREV-JUST-VALUE & CURR-JUST-VALUE NOT=CURR-ASSD-VALUE

DOR USE CODES REVIEWED: 003, 010-049, 070-096, 099

FIELDS DISPLAYED IN SUB-REPORT 3: PARCEL_ID, USE_CD, CURR_JUST, CURR_ASSD, PREV_JUST, CURR_NEW_CNST, CURR_DELETION, HSTD, PCT_DIFF

PARCEL WILL SHOW UP IN THE EDIT IF: Current net new construction value is greater than 25 percent over the previous year's just value and the current year's assessed non-school value is less than the current year's just value.

PERCENT NEW CONSTRUCTION DIFFERENCE CALCULATION: To calculate the percent new construction difference in the edit, the edit subtracts the deletion value from new construction value then divides the difference by the previous just value.

The mathematical formula is: (New Construction Value – Deletion Value) / Previous Just Value

Non-Homestead Assessment Limitation Report Edit 5

Does the report show any counts for all unqualified transfers of non-homestead properties where the current non-school assessed value is less than the current non-school just value?

CURR-ASSD-VALUE < CURR-JUST-VALUE

This edit relates to unqualified transfers of non-homestead residential and non-residential properties where current assessed value is less than current just value. Under sections 193.1554(5) and 193.1555(5)(b), Florida Statutes, these should be reviewed to determine that a change in ownership or transfer of more than 50 percent of the previous legal ownership entity has occurred. If a change in ownership has occurred, even if the transfer is disqualified for other reasons, remove the 10 percent cap and move the assessed value appropriately.

DOR USE CODES: 000-049, 070-096, 099

FIELDS DISPLAYED IN SUB-REPORT 5: PARCEL_ID, USE_CD, CURR_ASSD, CURR_JUST, SALE_YEAR, SALE_TYPE, SALE, HOMESTEAD, EXEMPTIONS, PCT_DIFF

PARCEL WILL SHOW UP IN THE EDIT IF: Non-qualified sale (greater than \$100) in the prior year and the non-school assessed value is less than current just value

PERCENT DIFFERENCE CALCULATION: To calculate the percent difference in the edit, four different calculations can occur, depending on whether a new construction and/or deletion value is present:

- The Current Assessed Non-School Value minus the Previous Assessed Non-School Value, then divided by the Previous Assessed Non-School Value
- The Current Assessed Non-School Value minus the New Construction Value, then minus the Previous Assessed Non-School Value, then divided by the Previous Assessed Non-School Value
- The Current Assessed Non-School Value plus the Deletion Value, then minus the Previous Assessed Non-School Value, then divided by the Previous Assessed Non-School Value
- The Current Assessed Non-School Value plus the Deletion Value and minus the New Construction Value, then minus the Previous Assessed Non-School Value, then divided by the Previous Assessed Non-School Value
- **The calculation formula is:** $((\text{Current Assessed Value} - (\text{New Construction} - \text{Deletion})) - \text{Previous Assessed Value}) / \text{Previous Assessed Value} * 100$

SQL STATEMENT FOR NON-HOMESTEAD EDIT 5:
