TIP

No: 22B06-01

Date Issued:
May 10, 2022

Gross Receipts Tax Index Prices for the Period July 1, 2022 Through June 30, 2023

Every year on July 1, the index prices used by distribution companies to calculate the gross receipts tax on the sale or transportation of natural or manufactured gas to retail consumers are adjusted as provided by law. **Beginning with customer bills dated on or after July 1, 2022**, distribution companies must use the index prices listed below when completing the *Gross Receipts Tax Return* (Form DR-133).

Natural/Manufactured Gas Index Prices Per 1,000 Cubic Feet Effective July 1, 2022 Through June 30, 2023

Residential	Commercial	Industrial
\$22.22	\$11.53	\$5.50

Gross receipts tax due on the sale or transportation of natural or manufactured gas to retail consumers in Florida is calculated by multiplying the quantity sold or transported by the appropriate index prices listed above and then applying the 2.5% gross receipts tax rate. For more information, review the instructions on the *Gross Receipts Tax Return* (Form DR-133).

Electricity

The Department is required to announce the residential, commercial and industrial index prices for electricity. However, the electricity index prices listed below only apply if the transportation of electricity is sold independent of the sale of the electricity itself. Electricity index prices (cents per KWH) for the period July 1, 2022 through June 30, 2023, are as follows: Residential \$0.1201; Commercial \$0.0954; Industrial \$0.0781.

If electricity is sold to a retail consumer in Florida for a price that includes both a charge for the electricity and a charge for the transportation of the electricity, the gross receipts tax is calculated by using the distribution company's gross receipts multiplied by 2.5%, rather than through use of an index price.
