

Tax Information Publication

TIP

Number:
26B06-01R

Date Issued:
May 20, 2026

Revised:
May 26, 2026

On May 20, 2026, the Department issued TIP #26B06-01. That TIP included a mislabeled table. To ensure that you have the correct information, the Department has issued this revised TIP.

Gross Receipts Tax Index Prices for the Period July 1, 2026, Through June 30, 2027

Every year on July 1, the index prices used by distribution companies to calculate the gross receipts tax on the sale or transportation of natural or manufactured gas to retail consumers are adjusted as provided by law. **Beginning with customer bills dated on or after July 1, 2026**, distribution companies must use the index prices listed below when completing the *Gross Receipts Tax Return* (Form DR-133).

Natural/Manufactured Gas Index Prices Per 1,000 Cubic Feet Effective July 1, 2026, Through June 30, 2027

| Residential | Commercial | Industrial |
|-------------|------------|------------|
| \$25.48 | \$12.19 | \$6.94 |

Gross receipts tax due on the sale or transportation of natural or manufactured gas to retail consumers in Florida is calculated by multiplying the quantity sold or transported by the appropriate index prices listed above and then applying the 2.5% gross receipts tax rate. For more information, review the instructions on the *Gross Receipts Tax Return* (Form DR-133).

Natural gas prices are based on calculations provided in the April 30, 2026, issue of *Natural Gas Monthly* published by the U.S. Energy Information Administration. Section 203.01(1)(e)2., Florida Statutes, states in part: “If publication of the indices is delayed or discontinued, the last posted index shall be used until a current index is posted or the department adopts a comparable index by rule.”

Electricity Prices Per Kilowatt Hour
Effective July 1, 2026, Through June 30, 2027

| Residential | Commercial | Industrial |
|--------------------|-------------------|-------------------|
| \$0.1586 | \$0.1258 | \$0.0944 |

The Florida Department of Revenue is required to announce the residential, commercial, and industrial index prices for electricity. However, the electricity index prices listed above apply only if the transportation of electricity is sold independent of the sale of the electricity itself.

If electricity is sold to a retail consumer in Florida for a price that includes both a charge for the electricity and a charge for the transportation of the electricity, the gross receipts tax is calculated by using the distribution company’s gross receipts multiplied by 2.5%, rather than using an index price.

Electricity prices are based on calculations provided in the April 30, 2026, issue of *Electric Power Monthly* published by the U.S. Energy Information Administration. Section 203.01(1)(e)2., Florida Statutes, states in part: “If publication of the indices is delayed or discontinued, the last posted index shall be used until a current index is posted or the department adopts a comparable index by rule.”
